California State University, Long Beach

Bachelor of Science in Management Information Systems (GPA 3.63)

May 2019

- Relevant Coursework: Python Programming, Mobile App Development, Internet App Development, Advanced Database Management, Systems Analysis & Design.

Antelope Valley College

Associate of Science in Business Administration (GPA 3.74)

June 2017

- Relevant Coursework: Java Development, Computer Concepts & Applications, Business Communications
-

PROJECTS

Student Enrollment: Oracle PL/SQL Package that calls procedures to validate student enrollment

- Developed a Package which enrolls/drops a student after all validation check procedures are met
- Utilized cursors to loop through & add waitlisted students when triggered by a course being dropped
- Implemented exception handling and audit tables to ensure data integrity

L.A. Brewers: Ionic mobile app for L.A. Brewers Guild which displays nearby Craft Breweries

- Utilized Google Maps API to display local breweries near the user's location
- Incorporated modals and page navigation to create a seamless user interface
- Developed a Firebase Realtime Database to get & post app/user data

Park 4 Park: Parking app which connects students allowing them to buy and sell parking spaces on campus

- Designed system sequence using UML standard notation, vision document, System Sequence Design, Activity Diagrams, and Domain Class Diagrams
 - Documented functional & nonfunctional requirements to create Fully Developed Use Cases
 - Designed & Developed a functional app prototype
-

SKILLS & ABILITIES

- **Programming/ Languages:** JavaScript, HTML, CSS, Python, MySQL, PL/SQL, Git.
 - **Database Management:** Oracle, Firebase, Access.
 - **System Design Software:** Visio, Justinmind, Excel.
-
